Robert,

This collection of pictures is not inclusive of all the phases in the construction of the NEW Revolution Raceway and Hobbytown of Oshkosh Wisconsin. It is, for the most part, a summary of the project from its beginning on the first walk through to the stage where it is at today, May 22nd 2004.

A year has past (and more) and hundreds of people have given their time to this endeavor. Those who have volunteered their time and efforts have done so with the belief that this project will create more of what we enjoy today. A place for friends to gather and enjoy the sport of R/C and slot car racing.

Robert, most of these pictures were taken by me not as part of a job, but done so to document for you the progress and changes for you to remember them.

As you know, your part was not just the outlay of money, but of considerable time from you (and from your family). That dedication to the hobby should not be overlooked. Hopefully, this becomes something to profit from not only in monetary terms, but that of children learning to be competitive, learning to think on their own and to master their goals. For the older crowd, it is the profit of friendships that have grown and flourish in the years to come.

Thank you, for your effort in creating this dream for those who share it. On behalf of our fellow racers and patrons, we all thank you from our hearts.

Hopefully, you view these pictures in a few months and then in a few years and look back and confirm, it is the house built by many and smile that your friends did this for you (and ourselves) to share with the next generation.

Thanks alone do not quite do it justice, but we (and I especially) really mean it.

Bill
HVF RACING TEAM
